Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	3.1.0
Resolution:			
Description			
<p>Hello,</p> <p>I have a problem with email notification Bitnami Redmine.</p> <p>I explain: I installed bitnami-redmine 3.1.0 on a Windows Server 2012 R2 virtualized and I would like to configure notification email redmine. So I opened the configuration.yml file in "C: \ Bitnami \ redmine-3.1.0-0 \ apps \ redmine \ htdocs \ config" and I write this inside:</p> <pre>email_delivery: delivery_method:: smtp smtp_settings: address: me@mycompany.com Port: 25 domain: mycompany.com authentication:: login user_name: me@mycompany.com password: mypassword</pre> <p>I followed this tutorial http://www.redmine.org/projects/redmine/wiki/EmailConfiguration but I still can not. "Error while sending the email (530-5.5.1 Authentication Required. Learn more at)"</p> <p>I thank you.</p>
