

Redmine - Feature #22095

A mixed version of issue state would be great

Description	
<p>In the current redmine version are two option possible for the "% done" ration:</p> <ul style="list-style-type: none">• via user selectable pulldown menu• via ticket states. <p>Via ticket state mode the percentage value can be left empty. In the documentation Issue statuses its documented:</p> <p>As per screenshot below, you can set the % Done for each status - (if left blank, changing an issue to this status will not change its percent done.)</p> <p>Would it be possible to enhance this with another option? If the % done is left blank, redmine will display the pulldown menu like in the mode via user selectable drop down menu?</p> <p>This would give the option, that a developer can adjust the "% done" in some states. But if the tickets will be set as an example into 'QA' issue state get an fixed value. The same is can be done for the closed states.</p>
