Target version:		Affected version:	3.2.0
Resolution:	Invalid		
Description			
Hi there,			
This defect was fixed in 3.1.4			
https://www.redmine.org/issues/21219			
The commit that fixed the bug is this one:			
https://www.redmine.org/projects/redmine/repository/revisions/14973/diff/trunk/app/views/issues/_attributes.html.erb			
In lines 52 and 59 this line:			
<pre><%= calendar_for('issue_start_date') if @issue.leaf? %></pre>			
Was replaced by this one:			
<pre><%= calendar_for('issue_start_date') %></pre>			
However, in 3.2.0 this change the old line is back:			
https://www.redmine.org/projects/redmine/repository/entry/tags/3.2.0/app/views/issues/_attributes.html.erb			
<pre><%= calendar_for('issue_start_date') if @issue.leaf? %></pre>			
And therefore the bug is back.			
In my 3.2.0 installation, changing the code fixes the issue. My environment (although it seems to be just a code issue):			
Environment:			
Redmine version	3.2.0.stable		
Ruby version	2.1.8-p440 (2015-12-16) [x86_64-linux]		
Rails version	4.2.5		
Environment	production		
Database adapter	Mysql2		
SCM:			
Git	2.1.4		
Filesystem			
Redmine plugins:			
redmine_ldap_sync	2.0.8.devel.gc3a7f280ec		
redmine_tags	3.1.0		
scrum	0.12.0		
Thank you, regards,
