

## Redmine - Defect #22162

### Workflow - Tracker/Role is not "project" specific

2016-03-07 15:16 - Anonymous

<b>Status:</b>	Closed	<b>Start date:</b>																			
<b>Priority:</b>	Normal	<b>Due date:</b>																			
<b>Assignee:</b>		<b>% Done:</b>	0%																		
<b>Category:</b>	Issues workflow	<b>Estimated time:</b>	0.00 hour																		
<b>Target version:</b>		<b>Affected version:</b>																			
<b>Resolution:</b>	Duplicate																				
<b>Description</b>																					
<p>We do have several different workflows established for different projects. Since most of our guys here do have different roles in different projects, the workflow feature does not seem to work correctly. We still see Ticket Status, which are not used in the workflow for the role PRJ_NAME-Manager (just to make it easier, the PRJ_NAME is used in the Rolename).</p> <p>I have tried it the other way around and added all Status to a Role which I do have as well (Manager), and now I do see all Status in the Ticket, even though I am not having the role "Manager" in this project.</p> <p>Could be, that this is related to <a href="#">#20384</a>.</p> <p>We are using still:</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.3.0.stable</td></tr><tr><td>Ruby version</td><td>1.9.2 (x86_64-linux)</td></tr><tr><td>Rails version</td><td>3.2.13</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>PostgreSQL</td></tr></table> <p>Redmine plugins:</p> <table><tr><td>parent_issue_filter</td><td>1.0.1</td></tr><tr><td>redmine_ckeditor</td><td>1.0.16</td></tr><tr><td>redmine_people</td><td>0.1.8</td></tr><tr><td>redmine_tagging</td><td>0.0.1</td></tr></table>				Redmine version	2.3.0.stable	Ruby version	1.9.2 (x86_64-linux)	Rails version	3.2.13	Environment	production	Database adapter	PostgreSQL	parent_issue_filter	1.0.1	redmine_ckeditor	1.0.16	redmine_people	0.1.8	redmine_tagging	0.0.1
Redmine version	2.3.0.stable																				
Ruby version	1.9.2 (x86_64-linux)																				
Rails version	3.2.13																				
Environment	production																				
Database adapter	PostgreSQL

### History

#### #1 - 2016-03-07 15:22 - Anonymous

Just for clarification. During my tests, I assigned all Status to the user Manager, but in the project I am testing, I do not have this role. Therefore it looks like the role is not determined from the project, but all roles belonging to my users are used. This is IMHO plainly wrong.

#### #2 - 2016-03-07 15:50 - Anonymous

Looks like this is because I am also registered as "admin". I guess, that this is the cause. Can anybody prove this?

#### #3 - 2016-04-06 05:38 - Toshi MARUYAMA

- Status changed from New to Closed
- Priority changed from High to Normal
- Resolution set to Duplicate

Duplicate of [#11625](#).

#### #4 - 2016-04-06 05:38 - Toshi MARUYAMA

- Is duplicate of Defect #11625: Administrator Does Not Follow Workflow For Project added
