Description Hello, My team is using LaTeX for documents, it would be great if we could collaborate to create documents using the wiki and then export to LaTeX for including in other documents. I found that RedCloth 4 is able to export to LaTeX but at I read in #1754 that Redmine could not easily upgrade to RedCloth 4. So, I'm just reporting that it could bring a feature that could be useful to some of us. Thanks, Gael

Since [#1754](#) is fixed, does this mean Latex export could be implemented relatively easily?

#3 - 2010-09-02 05:21 - Jean-Baptiste Barth

[#1754](#) only fixes support for Redcloth 3.x branch. Redcloth 4 is not supported yet but I opened an issue for that, see [#6269](#)
