Description	
<p>Hi,</p> <p>I post this modification here because I think it is useful.. Well at least for us :)</p> <p>After this patch if you create a new issue or change status of an issue or edit(!) an issue, then both author and assigned user will watch the issue automatically.</p> <p>Recipients will be watchers plus assigned user will receive mails always. Even if he disabled mail notifications. (It is our policy.)</p> <p>Managers will be CCed. This part is not a correct implementation so I commented it out in mailer.rb!</p> <p>I would love to see something like this in a redmine revision. We miss this feature so much.</p> <p>Thanks, Balazs</p>

History

#1 - 2011-06-13 12:14 - Jean-Baptiste Barth

- Category set to *Plugin Request*
- Status changed from *New* to *Closed*

Could go into a plugin. I close it since it's a very old ticket, feel free to re-open if needed.
