Description

It is currently not possible to add private comments from the issue bulk edit page, is this by design? If not it would be nice if this was possible.

+1

Sometimes, we want to add the same private note to multiple issues. Unfortunately, when you bulk edit issues, the checkbox to set the note as private is not present.

Thanks

- File fix-22368.patch added

- File fix-22368.png added

I made the patch (compatible with latest trunk 17055).
this patch allows user to set 'private notes' property on bulk edit page.

The patch always displays the "Private notes" checkbox and returns a 403 if the user is not allowed. I think it's better to display the checkbox when the user is allowed to set private notes only.
