Redmine - Feature #22474

Retrieve Gantt PNG/PDF using REST API

Description

It would be nice to be able to request the gantt chart in either PNG or PDF using the REST API.

As far as I can tell it would only require a small change in app/controllers/gantts_controller.rb, specifically adding in the:

```
accept_api_auth :show
```

line. Although there may be more to do to restrict this to PNG/PDF rather than HTML. But then maybe HTML is also viable?

Anyway, this would be a simple and easy addition to the REST API.

I would like to see this feature as a standard, too.
