Target version:		Affected version:	3.2.1
Resolution:	Invalid		
Description			
Currently i'm hitting an problem with deleting wiki pages after upgrading redmine from 2.6 to 3.2.			
In the transaction it fails on this sql statement in there where clause.			
<pre>DELETE FROM `wiki_redirects` WHERE `wiki_redirects`.`redirects_to_wiki_id` = 16 AND `wiki_redirects`.`redirects_to` = 'Nomailreceipt';</pre>			
Error message:			
Error Code: 1064. You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near ``wiki_redirects` WHERE `wiki_redirects`.`redirects_to_wiki_id` = 16 AND `wiki_re` at line 1			
After many debugging i found out that error occurs throughs an invisible unicode character in the query.			
I'm not if its because of an plugin or an encoding error through the Apache2.
