<b>Description</b>			
When opening the repository view in a project I get an internal server error with the following log entry			
<pre>Psych::SyntaxError ((&lt;unknown&gt;): found unexpected end of stream while scanning a quoted scalar at line 1439 column 7):   app/models/repository.rb:160:in `extra_info'   app/models/repository/git.rb:46:in `extra_report_last_commit'   app/models/repository/git.rb:97:in `scm_entries'   app/models/repository.rb:205:in `entries'   app/controllers/repositories_controller.rb:116:in `show'   lib/redmine/sudo_mode.rb:63:in `sudo_mode'</pre>			

### History

#### #1 - 2016-07-06 14:16 - Marco Descher

The error occurs if <https://github.com/elexis/elexis-3-core> is defined as main repository. If I select a different one, the page opens as expected.

So I guess, that there has to be something within this repository that provokes the resp. error.

Is there anything else I can provide? Rails etc. was satisfied with bundle install as documented.

What do you mean?

Repository which Redmine use needs to be local bare repository.

#### #7 - 2016-07-07 07:19 - Marco Descher

Certainly, the given repository is configured in reference to a locally stored bare repository.

The problem is, that I am not even able to delete the repository or edit it

When calling <https://xyz.foo.bar/repositories/18/edit> for example (which is my config page for this repo), I get

```

The same goes for delete

```

#### #9 - 2016-07-07 11:37 - Toshi MARUYAMA

- Subject changed from *Psych::SyntaxError ((<unknown>): found unexpected end of stream while scanning a quoted scalar to git: unable to delete from setting if extra\_info is invalid*

- Status changed from *Needs feedback to New*

#### #10 - 2016-07-07 11:38 - Toshi MARUYAMA

- Subject changed from *git: unable to delete from setting if extra\_info is invalid to git: unable to edit and delete from setting if extra\_info is invalid*

#### #11 - 2016-07-07 11:48 - Toshi MARUYAMA

I don't know why extra\_info had broken.

Try "Repsotiry.find(18).clear\_extra\_info\_of\_changesets" from rails console.

Or clear extra\_info from MySQL console.

#### #12 - 2016-07-12 08:34 - Marco Descher

- Status changed from *New to Resolved*

Thanks for your help. I deleted the extra\_info table in the MySQL database and re-executed the git indexing. Now the problem is gone!
