<b>Target version:</b> 0.9.0	<b>Affected version:</b>
<b>Resolution:</b> Fixed	

**Description**

As noted in help forum [Multiple lines in table cell](#), I also miss table cell with multiple line text.

```
+-----+-----+
| redmine | Multiple projects support   |
|         | Flexible role based access control.|
|         | Flexible issue tracking system   |
|         | Gantt chart and calendar       |
|         | News, documents & files management |
|         | etc.                            |
+-----+-----+
```

If I want to make above table using textile wiki.  
The syntax below would match the expected (using <http://www.textism.com/tools/textile/index.php>).

```
| redmine | Multiple projects support
Flexible role based access control.
Flexible issue tracking system
Gantt chart and calendar
News, documents & files management
etc.|
```

But it doesn't match in redmine.  
I must use rowspan '/6.' to make this looks as expected. It is very inconvenient for a very complex table.  
attachment:hard\_breaks.patch solves above syntax works.

- comment from source:trunk/lib/redmine/wiki\_formatting/textile/formatter.rb#L1955)

I hope redmine experts to check. (I'm total stranger to ruby or rails)

wrong link posted.

`source:trunk/lib/redmine/wiki_formatting/textile/formatter.rb@2018#L43` is correct

**#2 - 2008-12-16 09:58 - youngseok yi**

for a couple of check, this patch breaks quote syntax like below.:(

> this is quote  
>> this is double.

**#3 - 2009-02-17 11:02 - Rene S**

We are affected by that too. After a migration from 0.7 to 0.8.1, a lot of tables are broken, because the newline is not handled correctly. Additionally all control commands within the cell are ignored, besides some simple bold/italic commands. So applying plain-html did not work either.

**#4 - 2009-05-13 16:23 - Stanislav German-Evtushenko**

same for me

**#5 - 2009-07-19 16:22 - Jean-Philippe Lang**

- Status changed from New to Closed
- Target version set to 0.9.0
- Resolution set to Fixed

Fixed in r2824.
