Target version:	3.4.0			
Resolution:	Fixed			

Description

Hi,
when I enter in trackers#index the redmine make this query for each tracker:

```
SELECT COUNT(*) FROM "workflows" WHERE "workflows"."tracker_id" = $1
```

But there is no index for "workflows"."tracker_id", and each query takes 88ms +-

After add index each query takes 0.3ms
