Resolution: Invalid	

Description

Hi I didn't found anything about it.

Is it possible to show the fixed_version/target version of an issue when retrieving the issues.json ?

If it is already possible, I'm sorry for creating an issue, but would be pleased if anyone can tell me how it's done.

Ok monday and too early for me ... Indeed the target version shows up in my json object - **when** I call an issue *with* a target version :P

Sorry for this obsolet one...
