

Redmine - Defect #23816

Redmine-Search: everything before a colon in the title will be cut off in search results

2016-09-12 10:21 - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	3.3.0
Resolution:	Invalid		

**Description**

**Redmine Release 3.3.0: Search results display truncated (searchdisplaytuncated)**

When you do a search for tickets containing a colon ":" in the title, everything before the title will be cut off when displaying the search results.

To reproduce:  
Do a search for the string "searchdisplaytuncated" and this ticket will display as a result with the words "Redmine-Search" not showing up.

As we are using initial descriptors in our ticket titles this is not a purely cosmetical but rather important problem.

History

#1 - 2016-09-12 10:23 - Anonymous

Just tried it out - and on this installation it works.

What is "Redmine-Search"?

#3 - 2016-09-13 11:11 - Anonymous

Thanks for your fast reply. The ticket can be closed. I tested this on a redmine test installation and this defect does not occur. So it is caused by one of the plugins and my own responsibility to take care of.

Thanks a lot

Immanuel.
