<b>Target version:</b>	<b>Affected version:</b> 2.5.2
<b>Resolution:</b> Invalid	

**Description**

Hi guys,

Found an error on activating a link on an announce :  
NoMethodError (undefined method `reverse!' for #<ActiveRecord::Associations::CollectionProxy []>):  
app/controllers/news\_controller.rb:62:in `show'

There is a workaround by commenting the faulty line :

```
def show
@comments = @news.comments    # @comments.reverse! if User.current.wants_comments_in_reverse_order?
end
```

but I miss skills to figure out what's happening.

Environment:  
Redmine version 2.5.2.devel  
Ruby version 2.1.5-p273 (2014-11-13) [x86\_64-linux-gnu]  
Rails version 4.1.8  
Environment production  
Database adapter MySQL2

### History

#### #1 - 2016-09-17 05:26 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid

Redmine 2.5.2 is too old.

It is not use Rails 4.1.8.

#### #2 - 2016-09-19 11:00 - Jean-Michel Bain-Cornu

OK.

As it was install recently by Debian apt, that means this package is not up to date, and another one must be taken, probablement from a development server.

Thanks
