

## Redmine - Defect #2388

### 422 response from mail\_handler

2008-12-23 05:19 - youngseok yi

<b>Status:</b>	Closed	<b>Start date:</b>	2008-12-23
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Email receiving	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	
<b>Resolution:</b>	Invalid		

**Description**

To receive email, I'm using simple perl script to pull the mail from POP3 and redirect to rdm-mailhandler.rb. If issue submission not successful, the script save mail to temp folder and reply to the sender about failure of issue submission.

During 2 weeks running, almost 70% of mail getting **422 response** from mail\_handler.

Posting to `http://redmine.hostname/mail_handler...`  
Response received: 422

6% of them was 500 reponse, last of them was successful.

I attached one of them (causing 422 response) [mail-20081223.eml](#). (mail address and some hostname blocked)

p.s. The issue submission fail notification useful because sender couldn't get any report!

### History

#### #1 - 2008-12-24 14:11 - Jean-Philippe Lang

I see no defect here since I can receive the attached email using something like:

```
ruby extra\mail_handler\rdm-mailhandler.rb --url http://localhost:3000  
--key secret --project redmine -v < mail-20081223.eml
```

The issue is properly created.

The 422 response that you get means the ticket could not be created. There may be several reasons for that:

- the user is unknown (no redmine user with the same email address as the email sender)
- the project is not specified (you may specify a default project using the --project option)
- you have created some required custom fields for the target project/tracker

You may find some usefull information in your log file.

#### #2 - 2008-12-26 05:11 - youngseok yi

- Status changed from New to Resolved

Thanks JP. The issue is not from redmine at all!

I had tried to use IPC::Run3 (perl module) to manipulate piping raw mail (scalar buffer in my script) to rdm-mailhandler.rb. It seems better to save mail as temp file and do as explained above (< mail-20081223.eml). I don't know why but it works fine.

#### #3 - 2008-12-27 17:38 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Resolution set to Invalid

OK, thanks for the feedback.

#### #4 - 2009-11-28 13:20 - Jean-Philippe Lang

- Category changed from Email notifications to Email receiving
