<b>Target version:</b>	
<b>Resolution:</b>	

**Description**

I would like to be able to forward or cc an email to the account used by my Redmine instance, include:

...

Issue: [#123](#)  
Project: Bar  
...

And have the correspondence appended to issue [#123](#) in project bar. Right now, I need to change the subject line to `Re: [Task [#123](#) ]` in order for the email content to be appended to issue [#123](#) instead of having a new issue created.
