

Redmine - Feature #23955

Set sudo mode timeout to 0

2016-09-28 23:43 - Mike Sweetman

Resolution:	Wont fix		
Description			
regarding r14353 :			
I would like to disable the timeout feature by setting sudo_mode_timeout to 0. currently, if I set the timeout to a value less than 1, it defaults to 15 minutes.

#1 - 2016-09-30 17:22 - Felix Schäfer

As the comments above state the default is disabled [source/trunk/config/configuration.yml.example#L173](#) , so if you omit everything sudo-mode related it should not kick in. Setting sudo_mode: false should also disable it.
