

Redmine - Feature #24383

REST API for time entries does should support updated_on filter

2016-11-16 14:34 - Adrian H.

Description			
Pulling differences ("since last update") from Redmine into another system is essential for saving time; larger projects produce tables > 20'000 entries easily. For time entries, I miss the updated_on filter (as known on issues) very much.
