Description			
see as flow image: I use SSMA for mySQL Client to tranfer redmine database from mysql to sqlserver2014,everything is ok. but s few weeks ago ,we find that,if I chang some issues parentId,it works well but the tree view is wrong.like this: I change issuess 218947's parentId is 218972.after I promit change,the tree view show it's parentId is 218937. for help.			

History

#1 - 2016-11-24 07:47 - ☐ ☐☐

I want to check is database is the reason.I delete the database,and user db:migrate to create new sqlserver2014 redmine database,do the same things, I change some issues's parentId,the same as it,the web view is wrong.
is redmine3.3.1+SQL SERVER2014 's bug?
