Description

There is problably a bug, when entering spent time:

- 2h -> it will enter 2 hours
- 1,5h (or 1.5h) -> it will enter 0 hours !!!

But form is saved without any errors, so user don't know that time wasn't added, it's really critical!

There should be some error message and form shouldnt be saved, when user enter some invalid value which results in 0 hours.
