

## Redmine - Patch #247

Notification mail sender is the author and includes project information.

2008-01-08 05:34 - Hans Yoon

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 50%
<b>Category:</b> Email notifications	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Description</b>	
<p>(1) Like TRAC, each mail notification has its own header, so it helps mail client filter mails easier. The mail header is "X-redmine-project".</p> <p>(2) When mail is notified, default mail sender is fixed as administrator has defined. With this patch, most of mail message is sent from event generating user.</p>

### Associated revisions

#### Revision 1265 - 2008-03-16 17:52 - Jean-Philippe Lang

Add the following headers to email notifications (#830, #247):

- X-Redmine-Host: host name defined in application settings
- X-Redmine-Site: application title defined in settings
- X-Redmine-Project: identifier of the project that the notification is related to, if any
- X-Redmine-Issue-Id, -Author, -Assignee: ticket related info
- X-Redmine-Topic-Id: identifies the thread a message belongs to

### History

#### #1 - 2008-03-16 17:55 - Jean-Philippe Lang

- *Category set to Email notifications*
- *% Done changed from 0 to 50*

Headers added in r1265.

Concerning (2), some SMTP servers won't authorize emails with a FROM adress different from the one used for authentication. It could be an option but not the default behaviour.

#### #2 - 2009-10-19 10:47 - Patrik Kullman

Can these also be used in incoming emails to override Project etc in the header instead of the mail body?

#### #3 - 2010-01-25 10:43 - Ryan Phung

Any idea whether (2) can be added as optional behaviour?

It will be a very nice feature, and will allow notification to be done more effectively.

In big project teams, when people receive a lot of email they usually filter their email by sender (for example, give more priority to email sent from the boss, from customers, etc.); it is difficult to make the transitions to using Redmine because one cannot filter his/her messages the same way anymore. To rely on Redmine notifications, one has to read every email.

**#4 - 2010-01-25 10:45 - Ryan Phung**

- Assignee set to Jean-Philippe Lang

Changed "Assigned to" to Jean-Philippe Lang (I hope this mean this patch will be brought to your attention). Apologies if this is not the correct way of doing it.

**#5 - 2010-02-10 02:57 - Eric Davis**

- Assignee changed from Jean-Philippe Lang to Eric Davis

I have some code that does this already. I'll need to see if I can extract it and make it optional.

Hey Eric,

We're very interested in this functionality. Possible to post here? Whatever you've got would be useful.

Thanks!

-Brenton

**#7 - 2010-04-29 23:45 - Jean-Philippe Lang**

Another option is proposed in #5405. So the Form field could be one the following:

- [redmine@example.com](mailto:redmine@example.com) (current behaviour, a single configured emission address)
- John Smith <[redmine@example.com](mailto:redmine@example.com)> (the emission address with the user name)
- [john.smith@foo.bar](mailto:john.smith@foo.bar) (the user email address, as it's done in the attached patch)

A setting could be added to choose between these 3 options.

**#8 - 2010-07-16 14:53 - Vladimir Dzalbo**

looks cool.. but the patch is rather outdated..

is that possible to have a similar patch for current trunk?

**#9 - 2010-10-25 17:00 - Eric Davis**

- Assignee deleted (Eric Davis)

**#10 - 2015-12-02 09:51 - Sebastian Paluch**

+1

**#11 - 2015-12-30 16:49 - Toshi MARUYAMA**

- Related to Feature #14727: Display pretty notification email sender name added
