Redmine - Patch #24776

UI inconsistencies on /enumerations/index view

2017-01-07 18:41 - Mischa The Evil

Status:	Closed		**Start date:**

Target version:	3.4.0			

Description

Coming out of and a follow-up to [#24720](). I spotted three things that could benefit improvement:

- re-position the new enumeration links to above the item tables (in line with [#24720]() changes)
- add 'icon' and 'icon-add' classes to the new enumeration links (like most, if not all, new ... links in both the front- and the back-end) to make them stand-out more
- handle cases of none existing enumerations using the regular no-data message blocks

I attach three patches implementing these changes. This patch serial, against current [source:/trunk@16156](), is produced using git format-patch which makes the individual patches apply-able using "patch -p1 < 0001-...".

#2 - 2017-01-09 10:29 - Mischa The Evil

- Related to Feature #24720: Move all 'new item' links in project settings to above the item tables added

#3 - 2017-01-09 13:14 - Go MAEDA

- File before-add-margin.png added

- File after-add-margin.png added

- Target version set to Candidate for next major release

Nice improvement.

But I think it would be better to set more margin between the table and the next heading. Please see the following screenshots.

current patch:

Enumerations

Document categories

⊕ New value

Name	Default value	Active			
User documentation		✔	⇕	🗑	Delete
Technical documentation		✔	⇕	🗑	Delete

Issue priorities

I totally agree. Thanks for reviewing and your feedback. I'll leave an updated, rebased patch set — against [source:/trunk@16171](#) — adding a fourth patch containing the CSS rule you've proposed. The first three patches didn't change by content, only its metadata.

Regarding the CSS rule: while it fixes practical all cases[1], it does leave a difference between the space between the tables and the following headers ánd the space between the paragraphs and the following headers. See the following two screenshots:

- Remaining difference made visual:
  rare-case-indifferent-distance.png

- Extreme case without any enumerations at all:
This cannot be fixed easily (and in a clean way) due to the current structure of the page. Though, given the rarity of the case, I think I can live with this minor drawback/trade-off. But, YMMV...

[1] I've almost never seen Redmine instances in production without enumerations, only just installed ones where no default data was loaded yet.

Looks good to me. Thanks!
I think this issue is now ready to be merged. Setting target version to 3.4.0.

[1] I've almost never seen Redmine instances in production without enumerations, only just installed ones where no default data was loaded yet.

Absolutely agree.

#9 - 2017-01-14 11:05 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

Patch committed, thanks Mischa.
