Target version:	Affected version:
Resolution: Invalid	

Description

"Edit" a Comment clears the text of the comment (it gets hidden). reloading the page shows the text again. See Screenshot.
Is that an update-error or might there be an error within redmine?

I use:

- ruby:_1.8.7 (2008-08-11 patchlevel 72) [i486-linux]
- mysql: 5.0.51a-19~bpo40+1 (Debian)
- how to find out the rails version??
- redmine 0.8.0.stable (MySQL)

History

#1 - 2009-01-11 11:47 - Jean-Philippe Lang

Clicking on 'Edit' should make the comment editable, with an ajax request.
Can you post the application log and give your browser version.

#2 - 2009-01-12 18:21 - Sepp _

- Status changed from New to Resolved

Solved the problem.
the changed .htaccess files locked some directory's on my apache to lighttpd-proxy.
After that, the error still exists. another firefox-browser-cacheflush was necessary.

Thanks for all your work and sorry for wasting your time!

#3 - 2009-01-12 18:55 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Resolution set to Invalid

OK, thanks for the feedback.
