Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.0
Resolution:	Invalid		
Description			
I'm trying to get all users on redmine using Python API, but get error said "Requested resource is forbidden". I don't know what the solution is to this error or any workaround? Or how can I get a user id by passing his/her login name. Thanks

Maybe you are using some python library, but it is third party software (software written in Python is not included in Redmine core). Please contact the author of the software.
