Redmine - Defect #24972

Installation issues

2017-02-01 21:15 - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid	Affected version:	

Description

Hello.

Is there anyone who might be familiar with such installation errors? This never happened on another hosting servers, when installed Redmine software:

[!] There was an error parsing `Gemfile`: (<unknown>): mapping values are not allowed in this context at line 9 column 36. Bundler cannot continue.

- 1. from /var/www/vhosts/bernackis.com/redmine.bernackis.com/public/Gemfile:63
- 2. ------
- 3. if File.exist?(database_file)

database config = YAML::load(ERB.new(IO.read(database file)).result)

- $1. \ adapters = database_config.values.map \ \{|c| \ c['adapter']\}.compact.uniq$
- 2. -----

ERROR:rubymng:Command '['/usr/local/psa/admin/sbin/filemng', 'bernacki', 'exec', '/var/www/vhosts/bernackis.com/redmine.bernackis.com/public', '/bin/bash', '-l', '-c', 'bundle install --path vendor/bundle']' returned non-zero exit status 4

If someone knows how to handle these issues, kindly let me know, Thanks in advance!
