Description

Is it possible to have a per project setting for the issues' target version to either make it compulsory or optional? We need to have this for our project as some have versions while others don't.

- Tracker changed from Patch to Feature

- Subject changed from Target Version to New project setting: mandatory/optional configuration for target version issue-attribute

- Assignee deleted (Maxim Krušina)

#2 - 2013-03-18 16:26 - Daniel Felix

Well currently there is no option.
#12005 would give you the ability to build a workaround. Just create some additional roles to set some fields as required or not.

Maybe #12005 could be enhanced to be set on per project base.

#3 - 2013-03-25 16:07 - Dipan Mehta

Actually it is not the dependency on #12005 really. Effective 2.1.0 with #703, the said configuration on Target version is actually possible.

What is NOT possible is that the configuration can be changed on Per-project basis. For that there are other issues filed.

This issue is related to #850 and #4015.
