Redmine - Defect #25712

How to make a custom query on a project/subproject for all users to see

2017-04-27 06:20 - sg s

Status: Closed Start date: **Priority:** Normal Due date: Assignee: % Done: 0% Category: **Estimated time:** 0.00 hour Target version: Resolution: Invalid Affected version: 2.5.0

Description

Interested in making a custom query on a sub project and making the same available to all users on any project, so that the users can be on any project, but can execute this custom query.

Example: we have users working on different enhancements, but need the same users to see customer reported issues. So need them to have a look at a particular place, where they are added as watchrs, to pick up issues. plz help!
