Thank you for posting the patch.

But I think it would be better not to assume that the value of REPLIES\_PER\_PAGE constant is always 25. The test in your patch may fail if #26033 is implemented.

- File `reply_display_order_with_pre_page.patch` added

Hello, Go MAEDA. Thank you for your advice.

I improved it in order of reply display considering "per\_page".

- Target version set to 4.1.0

The patch works fine for me. And it also implements #26033.

Setting target version to 3.5.0.

This patch is great work but sometimes did not work well on my environment.

my environment:

- MySQL 5.6.42 (ClearDB)
- Ruby 2.5.5p157

- Redmine 4.0.3 + reply\_display\_order\_with\_pre\_page.patch

When showing the topic where

- count of the topic children is larger than per\_page\_option, and
- some children has more than one attachment files

In which case, r=xx parameter may not be expanded correctly due to incorrect paging.

On my environment, @replies.pluck(:id) generated an array containing duplicate IDs.

I could not identify the root cause, but I found a line includes(:author, :attachments, {:board => :project}) cause this problem.

Therefore, I corrected this problem as follows to avoid this problem:

- File reply\_display\_order\_with\_pre\_page\_2.patch added

I improved Minoru-Maeda-san's patch. My patch includes:

- This issue #26030 itself;
- display considering "per\_page" (#26033);
- place "reply" block considering the display order (like #31438);
- fix regression that I reported in #26030#note-6;
- fix regression where redirection after deleting a message raises an error; and
- fix test codes to pass rails test -n /Message.\*Test/.

Thanks for updating the patch. Can you check the content of test/integration/messages\_test.rb? It seems the class class MessagesTest is duplicated.

Oops, Thank you for checking my patch. I've removed the duplicated MessageTest.

My patch has still a some degrade bug where r=xx parameter may not be expanded correctly. This patch should not be merged.

4th revision of the patch attached.

I've rewrite MessageController#show to fix degrade bug where `r=xx` parameter may not be expanded correctly.

My internal testing (dogfooding) is on-going on my private redmine instance.
