Let's include this feature in 3.5.0 if there aren't any noticeable objection.

Attached the patch from #4179. Also, I find this feature quite important for a mention feature (#13919) because without this, it'll be necessary to use the user id (which is not so friendly from my point of view).

Regarding user's feedback, in #4179, there are no noticeable objections. Only pro opinions, from Jan from Planio, André Lozovey, me, Go Maeda and Mischa The Evil (not 100% sure).

Well, I am quite neutral about this proposal. I do think however that this is indeed a requirement for a user-friendly implementation of a mention feature like #13919.

Since there was no disagreement with the feature over the past year and a half, I think we can commit this change.
