| <b>Description</b><br>When updating a ticket, a user is presented with a number of options in the "Change properties" fieldset that they, on the whole, won't touch. In the normal life-span of a ticket, a user changes who the ticket is assigned to and it's percentage done. The remaining fields could be moved up to the expanding "more" link to help reduce visual clutter. |                                  |
