Target version:				
Resolution:	Fixed			

Description
This would be useful both for inline code in wiki pages/forum posts and for browsing files in the repository.

That would be neat indeed. But I guess that's rather CodeRay job. It's planned for 1.0RC1 which is due in ~50 days. So hopefully it will soon be available in Redmine too. (http://code.licenser.net/issues/show/78)

#3 - 2009-04-16 12:42 - Paul Quirk

Meantime, for wiki markup etc, using java lang support via the code markup tag does a pretty good job on c# code

#4 - 2011-04-30 00:16 - Mischa The Evil

- Category changed from Wiki to Third-party libraries

Changed issue-relations to reflect the upstream roadmap:

-	related to Feature #4264: Update CodeRay to 1.0 final
+	blocked by Feature #8253: Update CodeRay to 1.1 final

and changed to new - more appropriate - category...

#5 - 2011-04-30 02:55 - Mischa The Evil

- Target version set to Unplanned backlogs

#6 - 2011-05-06 10:16 - Ebrahim Mohammadi

Implementing #8120 as discussed would solve C# syntax highlighting, since both Google Code Prettify and Sunlight support C#.

+1 We are a C# house so this would be greatly appreciated.

#10 - 2013-03-22 05:00 - Mischa The Evil

Just came around forum-message: C# scanner file for CodeRay. Although it is old (for CodeRay 0.7.6.227; Redmine 2.3.0 uses 1.0.6 [source:/tags/2.3.0/Gemfile#L6]), it might provide (the base for) an interim solution untill the scanner has been actually implemented upstream.

#11 - 2013-03-22 11:07 - Etienne Massip

Up to 1.0.9 =)

> it might provide (the base for) an interim solution untill the scanner has been actually implemented upstream.

FTR, the issue in the Coderay IT is located here : https://github.com/rubychan/coderay/issues/54.

According to the CodeRay issue tracker the C# syntax highlighting feature appears to be slated for 1.1 but has been punted for around 4 years just as this issue has.

http://odd-eyed-code.org/issues/78

I'm assuming this is a new link to the same issue posted posted before in comment#2 (http://code.licenser.net/issues/show/78).

It appears that there is also a related forum thread on a [C# scanner file for CodeRay](#).

#15 - 2013-10-26 06:51 - Mischa The Evil

- Blocked by deleted (Feature #8253: Update CodeRay to 1.1 final)

#16 - 2013-10-26 07:00 - Mischa The Evil

A scanner for C# is not included in CodeRay 1.1[1].

Jeff Pierson wrote:

That is exactly what I said in note-10.

It seems the author of CodeRay has used/has been using several issue tracking systems over the years. The feature request to add a C# scanner is now being handled in an issue on GitHub (https://github.com/rubychan/coderay/issues/54), as already stated by Etienne in [#11](#).
