#### Description

The following patch boxes the news comment, as every other instance of commenting (e.g. on an existing ticket or in a forum) was boxed. Visual consistency and all that jazz. :)

**Revision 2353 - 2009-02-02 18:34 - Jean-Philippe Lang**

Adds a 'box' div around news comment form (#2632).

#### History

**#1 - 2009-02-01 22:19 - Jean-Philippe Lang**

Is there any reason why the <div class="box"> should not be inside the form?

Nope. Inside works just as well and is, as I gather you're implying, is a simpler change. :)

I considered adding class:box to the form itself, but that'd require making it .box display:block as well. Worth thinking about for long-term cleanliness of the XHTML/CSS, but in the short term, this works.
