| <p>E.g., when one writes a comment, in the activity view the line with the description (which is in <code>&lt;span class="description"&gt;</code> tags) should be rendered somehow and not just shown as plain text.</p> <p>It doesn't need to be or it could not be textile/markdown rendering, since I wouldn't expect headings or clickable links. Just strip off any formatting, show only the text of links, remove images, ... I don't know what else has to be done.</p> <p>screenshot.png</p> |                                  |
