Redmine - Feature #26357

Checking time tracking even if no hour spent

2017-07-05 12:51 - César DJ Caësar 9114

Description

For the moment, we can only access the time tracking of a tracker if we have at least 1 hour spent.
The problem is that I don't count time spent in hour but in days, and I created custom fields.
The users sometimes put the real amount of hours spent, and sometimes "0", because they indicate that they spent "X" days.

Is it possible to access the time tracking of a tracker even if we have no hour spent on it?

Well, a few points:

- First: don't use issues on redmine.org for (support) questions; these belong in the forums.
- Second: you can always access the spent time reports (both the report and the details) using the 'Spent time' (project) menu item(s) (and some other links pointing to these views).
- Last: it looks like as if the actual request of this issue is somewhat duplicating issue #9090.

Based on the considerations outlined above, I'll close this issue.
