Target version:	0.8.2		
Resolution:	Fixed		
Description			
<p>Since there is some need to add plugin's css style into redmine's page, I think it is a good place to add it in the plugin hook of view_layouts_base_html_head.</p> <p>But I need to know the controller name and action name before doing this, because only a few pages need plugin's css code.</p> <p>Example: Add plugin's activity into redmine's activity page need an additional css code.</p> <p>It's simple to implement, just modify two lines in base.rhtml:</p> <pre>ln17: <%= call_hook :view_layouts_base_html_head, :controller => @controller > ln64: <= call_hook :view_layouts_base_body_bottom, :controller => @controller %></pre>

History

#1 - 2009-02-03 13:11 - Thomas Löber

This relates to #2542 where "controller" and "request" are added to every hook call.

#2 - 2009-02-21 01:33 - Eric Davis

- Status changed from *New* to *Resolved*
- Target version set to 0.8.2

As of r2491, the current controller and request values are added to the context.

#3 - 2009-03-07 12:41 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*
- Resolution set to *Fixed*

Merged in 0.8-stable in r2558.
