Redmine - Defect #26778

Invalid "theme-*" CSS class in body element when theme name contains spaces

2017-08-28 16:20 - Go MAEDA

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Themes		**Estimated time:**	0.00 hour
Target version:	6.0.0			
Resolution:	Fixed		**Affected version:**	

Description

The body element in HTML has CSS classes correspond to the current theme, project, controller and action.

But "theme-*" class name is broken when the directory name of the theme includes "_" or " ". Assume that you have installed a theme whose directory name is "foo_bar". Redmine will generate a class name "theme-Foo bar". But it is clearly broken because a whitespace is used as a separater.

Here is an example.

```
<body class="theme-Foo bar project-ecookbook controller-issues action-index avatars-off">
```
