Description

If you have some/many projects and have to add some/many users, setting the Roles (and maybe other permissions) is quite cumbersome, so I propose

- grid overviews, that you can set the all roles (like Manager, Developer, Reporter) per Project or per User with **one Submit/Save**
- maybe it's better to provide radio button layout (rather than drop-down lists) for the roles
- checkboxes like "apply change on all" projects/users or "check/uncheck all" would be great
- maybe providing a filter for projects/users would be helpful
