Redmine - Patch #27219
Show default status on the trackers list

2017-10-18 06:43 - Tomomi Yuzuriha

Target version:	4.0.0			

Description

I noticed a problem when trying to delete a status.

An user cannot delete a status if the status is set to 'Default status' of some tracker.
Nevertheless, there is no way to know which tracker uses the status as a default status except for each tracker's edit page.
if you register a lot of trackers, it is very hard to check the default status.

To resolve the problem, I suggest showing the default status on the trackers list.
With this small improvement, users can see the default status of all trackers at a glance.

Please see the screenshot below for the details.

This seems to be a valid, real-world issue.

This is IMO a neat solution to the given problem. Setting target to 'unplanned'.

#2 - 2017-10-19 03:51 - Go MAEDA

Mischa, I think we can merge this tiny improvement without any harm and side effects. I would like to set target version to 4.1.0. Is it OK with you?

#3 - 2017-10-19 14:34 - Mischa The Evil

- Target version changed from Unplanned backlogs to 4.1.0

Ok for me. I change the target version to 4.1.0.

#4 - 2018-01-01 13:39 - Go MAEDA

I think showing default status on trackers page improves consistency because API for trackers (GET /trackers.xml) already returns default_status since Redmine 3.0.0 (see Rest_Trackers).

#5 - 2018-01-02 01:29 - Go MAEDA

- Status changed from New to Closed

- Assignee set to Go MAEDA

- Target version changed from 4.1.0 to 4.0.0

Committed the patch in r17140. Thank you for reporting and fixing this issue.
