

## Redmine - Defect #27243

### Permission problem with share versions

2017-10-21 14:07 - Amir Sepahram

| <b>Category:</b>  | Permissions and roles | <b>Estimated time:</b>   | 0.00 hour |
| <b>Target version:</b>  |                       | <b>Affected version:</b> |           |
| <b>Resolution:</b>  |                       |                          |           |
| <b>Description</b>  |                       |                          |           |
| Hi,   |                       |                          |           |
| I've added a version in a project and shared it with project tree. Then I assigned some issues to it in both projects.  |                       |                          |           |
| It's supposed to work all right, though when I click on any of the issue links on Roadmap page, I get this error:   |                       |                          |           |
| "403 - You are not authorized to access this page."   |                       |                          |           |
| I am both Manager role holder - with permission to "manage version" - and redmine admin. Still I get the error, so that I have to go to issue list and use filters. |                       |                          |           |

#### History

##### #1 - 2017-11-20 17:00 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Please see [submissions](#).
