<b>Target version:</b>			
<b>Description</b>			
Rails 2.1.x is available with Ruby 1.8.7. <a href="http://weblog.rubyonrails.org/2008/6/26/this-week-in-rails-june-26-2008">http://weblog.rubyonrails.org/2008/6/26/this-week-in-rails-june-26-2008</a>  so, in <a href="#">RedmineInstall</a>  <div>Notes: * Rails has some compatibility issues with ruby 1.8.7. *The supported ruby version is 1.8.6*.</div> should be as follows,  <div>Notes: * Rails 2.0.x has some compatibility issues with ruby 1.8.7. Use ruby 1.8.6. * Rails 2.1.x is available with ruby 1.8.7.</div> Now distributions that includes ruby 1.8.7 are increasing. so, This is more appropriate for users who are going to try Redmine. ...i think.
