Redmine - Defect #27512

Totals on custom fields with different role contexts

2017-11-10 19:01 - Pierre de LESPINAY

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Custom fields		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	3.4.3

Description

Totals should exclude values from custom fields for which the context does not allow the user to see.

Example:
We have a custom field **field1** defined that is only visible by a manager.
  screen1.png

I'm a developer on project 1 and a manager on project 2.

If I go in the project 1's issues I can see the **field1** in the columns, it is empty since I don't have the permission to see it, but I can see it summarized in the totals:
  screen2.png

I didn't find any issue talking about it.
Is it a work in progress ?
