

Redmine - Patch #27559

Default branch should be always first in the graph

2017-11-18 09:28 - Maciek Dems

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: SCM	Estimated time: 0.00 hour
Target version:	
Description	
<p>In the revisions view, the branches graph shows neat lines for every branch. The branches in this are sorted alphabetically. However, it is much more natural to keep the default branch leftmost all the time, so it is always a straight line. It is how e.g. the network graph in github works.</p> <p>The attached patch changes the sorting of the branches to ensure, the default branch is always first.</p>

You also need to implement in Mercurial.

```
ActionView::Template::Error (undefined method `is_default' for "default":Redmine::Scm::Adapters::Branch):
```

```
1: <div class="autoscroll">
2: <%= show_revision_graph = ( @repository.supports_revision_graph? && path.blank? ) %>
3: <%= if show_revision_graph && revisions && revisions.any?
4:   indexed_commits, graph_space = index_commits(revisions, @repository.branches) do |scmid|
5:     url_for(
6:       :controller => 'repositories',
7:       :action => 'revision',
