

## Redmine - Defect #27804

### Restriction of user visibility isn't working with internal authentication

2017-12-15 10:59 - Philip Heise

<b>Target version:</b>		<b>Affected version:</b>	3.3.1
<b>Resolution:</b>			
<b>Description</b>			
<p>Hi,</p> <p>I'm using Redmine 3.3.1 (Debian Stretch). I have two authentication methods configured: internal and LDAP. In the Settings I use the following settings:</p> <ul style="list-style-type: none"><li>- User visibility: Members of visible projects</li><li>- Member management: All Roles</li><li>- Permissions: Manager members</li></ul> <p>I discovered that the restriction to view only members of visible projects (in every project's members configuration) only works for users with LDAP authentication. If a user account uses the internal authentication it can view the list of all redmine user accounts.</p>			

#### History

##### #1 - 2018-01-13 18:38 - Toshi MARUYAMA

- File *show-user.png* added

- Status changed from *New* to *Needs feedback*

I cannot reproduce on vanilla Redmine version:3.3.5.

I got 404 on both of internal and ldap.

Which form is the **list**?

It's the user select dialog that opens when you want to add new users in the project's configuration.
