**Description**

i just began some tests with rails 2.2.2 and revision 2479 of redmine.
at first glance, all seems well... then a bug happens in action_mailer,
while submitting an update to an existing issue :

```
NoMethodError (undefined method `finder' for #<ActionView::Base:0xb6ee3548>):
    /vendor/plugins/engines/lib/engines/rails_extensions/action_mailer.rb:73:in `initialize_templa
te_class'
```

luckily, it's a known bug and that patch fixes the issue, see :
http://github.com/lazyatom/engines/commit/499ce3b0480d8fa9375203f5efcadb8cf6ea9efe

## History

**#1 - 2009-02-21 10:55 - Jean-Philippe Lang**

*- Status changed from New to Closed*

*- Resolution set to Invalid*

Well, there's a branch for Rails 2.2 migration in source:/sandbox/rails-2.2
Engines plugin was updated in this branch.
It will be merged very soon (maybe this week-end).
