

Redmine - Patch #28025

Access project jump box with hotkey

2018-01-19 16:43 - Bernhard Rohloff

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: UI	Estimated time: 0.00 hour
Target version: Candidate for next major release	
Description	
<p>Accesskeys are a very convenient though quite unknown feature of Redmine. This patch adds an additional accesskey ('j' for "jump") to the project jump box in the header section. With this hotkey you are able to switch between projects very fast and without the need of touching the mouse.</p>

A much needed function. Would be super useful if the patch gets integrated!
