

Redmine - Defect #28069

Queries 403 error if query author is not in the roles list

2018-01-25 10:44 - Stephane Evr

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
How to reproduce (with vanilla redmine 3.4):			
<ul style="list-style-type: none">- Go to a project where you are a member with Role A- create a query and save it. make it visible to Role B- Save the query			
Result:			
<ul style="list-style-type: none">- Error 403			
In my opinion, a query should always be visible to its author, provided that he has sufficient rights to access the project.			
How to fix it:			
Here: https://github.com/redmine/redmine/blob/7fd04e1f8d36d78ee4f680d0a312c9eac2c65e90/app/models/query.rb#L339			
In the case above, a simple check on user == self.user should fix the problem
