

Redmine - Defect #28205

Wrong values in status combo

2018-02-17 15:32 - Albrecht Dreß

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:		Affected version:	3.3.1
Resolution:			
Description			
<p>I would like to have the following configuration for the workflow of a <i>Reporter</i>:</p> <ol style="list-style-type: none">[s]he may only create or re-open a closed ticket;if a ticket is in state "Feedback", [s]he may edit the ticket, and the next state must be <i>In Progress</i>. <p>So I gave the Reporter Role the issue tracking permissions (inter alia) "Edit issues" and "Add notes", and configured the workflow as in the attached screenshot "Config.png".</p> <p>However, when a user with role Reporter now edits a ticket in state "Feedback" for which [s]he is the assignee, the combo for "Status" (see screenshot "Result.png") shows both the "required" next state (<i>In Progress</i>) and the current state (<i>Feedback</i>) as possible values. But the latter should actually not be allowed according to the configuration.</p> <p>Did I miss something in the configuration, or is this a bug (or feature)?</p> <p>My environment, on a standard Debian Stable (Stretch) box:</p> <ul style="list-style-type: none">- Redmine version: 3.3.1.stable- Ruby version: 2.3.3-p222 (2016-11-21) [x86_64-linux-gnu]- Rails version: 4.2.7.1- Environment: production- Database adapter: PostgreSQL			

History

I'm poking around trying to see if there is a bug reported for my issue, which is this: Existing tasks do not reflect changes to workflow. If I create a task, then change the workflow, the status combo doesn't reflect the correct value. But if I create a new task it does.

This might be why you're not seeing what you're expecting.
