<b>Category:</b>	Plugin API	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Candidate for next major release		
<b>Resolution:</b>			
<b>Description</b>			
<p>Redmine can register plugin same ID with registered one. Currently, below problems exist.</p> <ul style="list-style-type: none"><li>- @registered_plugins[id] is overwritten.</li><li>- /admin/plugins shows only one plugin</li><li>- but load_path, view_path, ... are changed</li></ul> <p>I want to reject and log warning second or later plugins.</p> <p>functional/settings_controller_test.rb was already registered foo plugin twice. I cleared on teardown to pass unit test.</p> <p>This ticket related to #27705.</p>			

#### History

##### #1 - 2018-04-02 07:01 - Go MAEDA

- Category changed from *Plugin Request* to *Plugin API*
- Target version set to *Candidate for next major release*

We see the following error when plugin IDs conflict. It is difficult to debug. I think the patch helps to find the cause of such problems.

```
$ bundle exec rails c
/path/to/redmine/lib/redmine/menu_manager.rb:370:in `add_at': Child already added (RuntimeError)
  from /path/to/redmine/lib/redmine/menu_manager.rb:387:in `add'
  from /path/to/redmine/lib/redmine/menu_manager.rb:305:in `push'
...
```
