And what would be a linked lists type custom field?

#2 - 2009-02-28 11:43 - Vasia Pupkin

for example: linked lists is a relations between "country" list and "city" list

- File `linked_lists.js` added

im a js developer, but newbie in RoR. I solve this issue with `linked_lists.js` and naming items in custom field lists like:

```
1. Item 2 (custom field list 1)
1.1 Item 1 (custom field list 2)
1.2 Item 2 (custom field list 2)
1.3 Item 3 (custom field list 2)
2. Item 2 (custom field list 1)
2.1 Item 4 (custom field list 2)
2.2 Item 5 (custom field list 2)
2.3 Item 6 (custom field list 2)
```

can anyone make it be compatible with server RoR code and administration page?

ps: sorry for my english
